Eng./Russ.

The Length of Minimal Tests for Rectangular Tables. II—A. D. Korshunov	1	1
Turing Machines with Three States and Two Symbols, and with One State and n Symbols—Yu. A. Kryukov	15	12
Comparison of Discrete Converters in Terms of Absolute Speed of Response in a Certain Equivalence Class—Yu. G. Shukuryan	17	14
The Problem of Completeness in the Structural Theory of Probabilistic Automata— L. V. Makarevich	22	17
On a Certain Method of Obtaining the Lower Complexity Bounds of Contact Networks, and on the Complexity of Implementation of Functions "Having a Small Number of Ones" by Means of Contact Networks—T. V. Danilova-Danil'yan	27	21
Aspects of the Theory of Local Algorithms on Graphs—L. V. Khutoryanskaya	37	29
Estimates of Functions Characterizing Turing Machine Operation—V. A. Mosh- chenskii	45	34
On the Formulability of Predicates on Finite Models—B. A. Romov	54	41
On Complexity of Representing Permutations of Symmetric Semigroups in Terms of the Elements of the System of Generators—Yu. V. Golunkov	56	43
Attained Evaluations of the Length of Kohavi-Lavalle Control Experiment —I. S. Grunskii	59	45
Parallel Operator Schemes—V. E. Itkin	62	47
Optimal Placement of Information on Magnetic Tape with Prior Positioning of the Tape—S. S. Veniaminov and G. A. Sokolov	67	51
Potential Efficiency of Discrete Accumulators of Pulses—G. K. Vlasova, P. S. Davidenko and V. Yu. Lapii	78	59
Optimal Code-Redundancy Methods for Error Correction in Finite Automata —Yu. G. Karpov and M. G. Karpovskii	82	62
Some Ways of Developing Digital Cybernetic Apparatus—A. P. Vishnevskii	89	68
A Method of Describing Information Flows in an "Object-Machine" System —M. M. Grudin and V. M. Egipko	101	79
The Finiteness of Methods of Solving a Problem in Quadratic Programming —V. N. Gordeev	110	85
Scheduling Theory. Problems and Methods of Solution. I.—V. Ya. Burdyuk and V. V. Shkurba	115	89
An Extension of the Class of Penalty Functions in Scheduling Problems—A. D. Glu- bochanskii	136	103
Asymptotic Behavior of Solutions to the Johnson Problem—V. M. Portugal	139	105
Operational Reliability Analysis of an Aggregate of Complex Systems—V. E. Dikarev and N. A. Shishonok	143	108
Cooperation of Leontief Models—I. A. Krass and I. A. Poletaev	153	116
Multistage Quantitative Games with Unprescribed Time—A. Blaquièrre and G. Leitmann	164	124
Procedure Classification in ALGOL-60 Type Languages—B. A. Zagatskii	173	130
The Solution of the Transportation Problem with Fixed Liabilities—P. P. Ignatenko ...	195	146

On the Attainable Upper Bound of the Length of the Minimal Adjustment Experiment for a Moore Automaton—A. M. Bogomolov and I. S. Grunskii	198	147
On the Determination of the Upper Bound for the Knapsack Problem with Additional Constraints—B. G. Litvak and A. V. Naivel't.	200	149

N. M. Grishchenko, V. V. Fedyurko, O. D. Felizhanko, and G. G. Sherstoboeva ..	1021	72
Capacity-Time Analysis of Data Recording and Transmission Systems		
—V. P. Vinnitskii	1025	75
Certain Questions of Convergence of Generalized Gradient Descent—N. Z. Shor		
and P. R. Gamlurd	1033	82
Remarks on the Estimation of the Correlation Function for a Stationary Gaussian		
Process—P. S. Knopov	1037	85
The Structure of Differential Games Described by Equations with a Lagging Argument		
—E. S. Polovinkin	1040	87
Error Analysis of Convex Programs—V. E. Truten'	1044	90
Probabilistic Approach to the Solution of the Priority Problem—S. M. Fishbein	1050	95
The Problem of Optimal Control for Economic Cooperation—S. G. Antimonov	1054	98
A Class of Linear Discrete Qualitative Games—A. A. Chikrii	1060	103
The Gradient Descent Method Applied to Convex Discrete Functions		
—M. F. Kaspshitskaya and I. V. Sergienko	1065	107

Discrete Optimization. Sequential Decision Schemes. I—V. A. Emelichev	1067	109
Informational Model of the Medical Process—A. A. Popov, V. M. Yanenko, and V. A. Shul'ga	1082	122
Optimization of File Allocation on Tape in Automatic Control Systems—E. A. Matér and N. E. Flmina	1090	130
A Method for More Efficient Utilization of the Digital Computer in Data-Processing Systems—V. P. Badanin and V. G. Koryakov	1101	140
Convergence of a Random-Search Algorithm—O. V. Guseva	1104	143
BRIEF COMMUNICATIONS		
A Simple Single-Level Storage Allocation Mechanism—V. V. Gusev and L. G. Kaminski .	1107	146
Investigation of Series with Literal Coefficients in the Solution of Certain Problems by the MIR-2 Computer—Yu. S. Fishman	1109	147
LETTER TO THE EDITOR		
Comments on My Paper "On a Certain Method of Obtaining the Lower Complexity Bounds of Contact Networks, and on the Complexity of Implementation of Functions 'Having a Small Number of Ones' by Means of Contact Networks" —T. V. Danilova-Danil'yan	1111	148
